

Applied Science, Inc. Product Bulletin

To: All Our Valued Customers

From: Applied Science

Subject: End of Life Programs for the Applied Science HemoFlow 200 and HemoFlow 300 devices

Date: December 2, 2009

Applied Science, Inc. ("ASI") has been pleased to provide our customers with the HemoFlow 200 scale ("HF 200") and HemoFlow 300 blood mixer and scale ("HF 300") over the past decade. However, as is often the case, especially in an environment of rapidly advancing technology and significant product improvement, there comes a time where product obsolescence becomes inevitable. In this regard, ASI has made the following decisions with respect to the HF 200 and the HF 300.

HemoFlow 200 Scale

Effective March 31, 2010 ASI will no longer sell the HF 200. Through that date product will be sold at a price of \$752 / unit, subject to availability. ASI will continue to supply spare parts for the HF 200 at standard prices; to the extent they are available, through June 30, 2010. After that date ASI will end of life the HF 200 and will provide product support for the device, subject to the availability of parts.

HemoFlow 300 Blood Mixer and Scale

Effective December 31, 2010, ASI will no longer sell the HF 300. Through that date product will be sold at a price of \$1,558 / unit, subject to availability. ASI will continue to supply spare parts for the HF 300 at standard prices; to the extent they are available through March 31, 2011. After that date ASI will end of life the HF 300 and we will provide our product support services for the device, subject to the availability of parts.

Should you require further information about these programs or need to place an order please call Applied Science at 530.273.8299 extensions 201 or 208.
